

Dear FCC/IC,

We are submitting test report SH12020037, which includes test data for FCC ID: Q9DMST200, to demonstrate compliance of FCC ID: Q9DMST200DFS, with the requirements for DTS band.

The data for FCC ID: Q9DMST200, is considered to be representative of Q9DMST200DFS, as the two devices are electrically identical and any firmware differences between the two would not affect the parameters and results reported.

These are the differences between Q9DMST200 and Q9DMST200DFS:

Q9DMST200 only enable Non DFS band, while Q9DMST200DFS will enable both Non DFS band and DFS band.

Best Regards

Greg Rocha
