Mr. Andrew Leimer
Federal Communications Commission
Authorization & Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

This is a request to review the file - FCC ID: Q9FKY405 (EA918485) and grant a Class II Permissive Change on the KY405 Portable Radio unit. We are asking to modify the existing grant of the KY405 model frequency (440-470MHz) to a frequency range of 450-512MHz on the KY405H model.

The modifications to the KY405H model would include a change from/to on the Receiver:

- -65dB to -70dB Wide Band
- -65dB to -70dB Spurious Rejection

from/to on the Transmitter:

- -34dB to -40dB on the FM Hum/Noise Narrow Band

We have submitted the low, middle and high frequency plots as requested. We would appreciate any effort to expedite this grant. Thank you for your cooperation in this matter.

Sincerely,

Annelle Frierson
VP Marketing
