Columbia, MD 21046

Ref: FCC ID: **Q9SAWR391V2**

Dear Sirs:

NORTHFIELD TELECOMMUNICATIONS, INC. d/b/a ADVANCED WIRELESS COMMUNICATIONS requests acceptance of the labeling proposal described below for transceivers bearing FCC identifier Q9SAWR391V2.

The subject transceivers are compact handheld models as shown in figure 1, authorized under 47CFR Part 90 for FRS and GMRS services.

Figure 1.

Because the majority of the transceiver housing is composed of display, speaker, operating controls, and a battery access cover, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery access cover is not acceptable because the battery access cover is a removable item. For this reason, NORTHFIELD TELECOMMUNICATIONS, INC. d/b/a ADVANCED WIRELESS COMMUNICATIONS proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

Figure 2.

The consumer packaging for these models includes the batteries as separate items, NOT installed in the radio. As such, the FCC identifier will be readily visible to the user before the batteries are installed and whenever the batteries are removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a transparent plastic "clamshell" but, because the battery access cover is installed on the radio, the battery compartment cannot be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), NORTHFIELD TELECOMMUNICATIONS, INC. d/b/a ADVANCED WIRELESS COMMUNICATIONS will add the FCC identifier "Q9SAWR391V2" on the clamshell packaging as shown in figure 3.

Figure 3

Label Size 35 X17mm

Sincerely,

P. Blakeley.
