Dennis,

After confirm with my client, the firmware be wrote to flash, for the channel selection by end user is impossible.

Thanks

Best Regards.

主旨

HI Stephanie

I got the revised external photos showing reverse connectors. This answers the cable question and the cable length question. The only outstanding item is the verification that the user cannot make this device operate on any non-US channels by use of software or any other means.

Once I get this, I can issue the grant.

Thanks  
Dennis
