

Operational Description

This device is a Wireless Access Point which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with CCK technique will be applied.

The transmitter of the EUT is powered by AC adapter and connected with managing computer through RJ45 and RS232 port. The antenna is dipole antenna with Reversed N Type the maximum gain of this antenna 5dBi connector. Under normal use condition, the user has to keep at least 20cm separation distance between radiator and the body of the user.

The other instruction, please have a look at the users manual.
