UK

RE: Class II Permissive Change Request
FCC ID: QAM017

To Whom It May Concern:

Please be advised that pursuant to FCC Rule 47CFR 2.1043 the manufacturer requests that the above-referenced model be approved for class II permissive change.

The reason for this request is PCA modified to include two holes to allow for use of through hole battery housing location. No change to Radio circuitry. During FCC testing tests showed field strength changed but remained within permissible limits. The change does not affect the performance of the device in service or exceed FCC limits.

Thank you for your attention to this matter.

Yours faithfully

Promethean
