Frequently Asked Questions

1) What can I do if my smart cooker is not working properly?

First, please unplug your power cable from wall socket, then plug in again. Please try setting the smart cooker up again.

To make sure your hardware is installed correctly, make sure that:

- the LCD is on (white screen)
- your Internet connection is working
- your router's wireless is turned on
- your router supports UPnP®
- your smart cooker is on the same network as
- your mobile device
- both your mobile device and smart cooker have a working Internet connection

If your smart cooker is still not working, check your router and make sure it has the latest firmware.

2) How can I use digital recipe to operation my smart cooker?

The smart cooker provide 50 digital recipe on AIONE Pro app. You can following the instruction to prepare the materials for cooking. After you put all the materials on your smart cooker, please close the cover correctly. Then use your AIONE Pro app on your smart phone to connect to your smart cooker. Then you can tag the Recipe to choose the recipe which you want to cook. Then tag the One-touch cook button to begin to cook.
