Re: Class II Permissive change letter for AN-80i (3.65 GHz)

Gentlemen:

The requested change is for extending the operating bandwidth of the AN-80i product from 3.65-3.675 GHz (25 MHz) to 3.65-3.70 GHz (50 MHz). The modification involves a software change made at the factory. Note this product features a CBP protocol, as per FCC's requirement, to allow operations in both restricted and unrestricted bands.

Please do not hesitate to call me or email me if you have additional questions.

Sincerely,

Keith Doucet,
