Applicant: Redline Communications Inc.  
FCC ID: QC8-AN80IE  
RE: Class II Permissive Change for AN-80i (3.3-3.8 GHz)

To whom it may concern:

This Class II permissive change application is been filed in order to extend frequency range for already approved product under FCC ID: QC8-AN80IE.

This change will extend frequency range from 3650-3675MHz to 3650-3700MHz.  
The implementation includes software change only.

The change implemented complies with FCC permissive change policies v04r04:  
No components have been added or removed, nor has there been any change to PCB.  
There is no increase in power rating on new frequencies.  
There are no possibilities for end user software implementation on new frequencies.

Sincerely,

A handwritten signature in black ink that reads "Rod Cronin". The signature is written in a cursive, flowing style.
