

Cover Letter

FCC ID: QCIIDXMOD1

Product Name: WIFI Module

Model No.: RL-UM02SPC-8812BU-V1.0

The client software and associated drivers will not initiate any transmission on DFS frequencies without initiation by a master. This includes restriction on transmissions for beacons and support for ad-hoc peer-to-peer modes.

A channel/frequency plan for the device showing the channels that have active scanning or passive scanning. Active scanning is where the device can transmit a probe (beacon) and passive scanning is where the device can listen only without probes.

The active scanning in frequency band: 2412MHz to 2462MHz and 5180MHz to 5240MHz. The passive scanning in frequency band: 5260MHz to 5320MHz and 5500MHz to 5700MHz (not include 5600MHz to 5650MHz).
