RE: FCC approval AEM3000 DCU

Richard,

I can confirm that the device listed above, (AEM3000 DCU), will be marketed in the USA for installation by trained service personnel only.

No antenna other than that supplied by Minorplanet Systems will be used with the device.

The AEM3000 DCU will be supplied with an anti-tamper cover. This anti-tamper cover will be fitted on installation to guard against any post-fit tampering to the device.

It will not be possible for the end user to replace a faulty antenna; this will require a site visit from trained service personnel approved by Minorplanet Systems.

If you require any further information please do not hesitate to contact me.

Regards,

M. G
