April 18, 2005

Dear Examiner:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

The accompanying Form 731 is being filed with the commission on our behalf by Siemic, Inc., a consulting and testing laboratory. Included as exhibits with the enclosed application, schematics, bill-of-materials(BOM), Airaya Operation, and user manual of the device from Atheros and Airaya, and the test report SL 05020802.

It is our intention to provide the commission with a full disclosure of our product so that its merits can be evaluated. Indeed, we are pleased to provide any further information that the commission might wish to see. It is not our intention, however, to make our proprietary process a matter of public record.

In view of the fact that the schematics, BOM, and associated Airaya Operations disclose the mechanism of our process, we ask that these portions (block diagrams, schematics, and Airaya Operations) of our application be withheld from public inspection as provided under FCC section 0.459. These documents contain details of the proprietary operation of product. These details are not readily discernible - even to technically sophisticated individuals - from our hardware and constitute trade secrets.

We request therefore that these documents and this letter be segregated from the body of our evaluation report and withheld from public inspection.

Thank you for your attention. Please let the undersigned know if the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in black ink, appearing to read "William G. Pabst", written in a cursive style.

William G. Pabst  
Vice President, Engineering  
AIRAYA Inc.
