● Simple Solution for Safe Driving

A unique hands-free solution that fits all phones and all cars. Let you talk safely while on business, running errands, commuting or traveling. Unit is self contained and works in any vehicle, so you can even use it in rental cars.

● Set Up Is Easy:

1. Push release button on side of speaker phone to open cradle. Place phone in cradle and squeeze side bracket against phone to tighten.
2. Release locking screw on adjustable earpiece arm and adjust height of the arm to fit your phone. Unscrew to raise arm.
3. Plug unit into lighter, press 88.5 FM preset on your radio and you are in the air. Use your car volume control to adjust the sound level.
4. Privacy switch feature: To ensure privacy on a call, flip the privacy switch down when you take a call, and the sound will only come out of the ear bud, flip the switch up for speaker phone.  
 Note: during initial setup, tune your radio to 88.5 FM (frequency used by the speaker phone) and set one of your radio presets so you can operate hands-free.

● Caution:

As with all hands-free devices, please be careful to pay attention while driving and especially while answering calls. Once you are in the air you will be able to watch the road while you talk freely.  
 Notice: The changes or modifications not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

● User Information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The FCC require the user to be notified that any changes or modifications made to this device that are not expressly approved by MONOERIC INTERNATIONAL CO., LTD (the manufacturer) may void the user's authority to operate the equipment.
