

ITM320 Bill of Materials

Version: Mass Production, MP0

Product Part Number Definition

For production purposes, a part numbering scheme has been introduced to enable unique identification of each hardware/software configuration.

ITM328 Variants

ITM328 - xx - yy - zz-zz zzzz

ITM329 Variants

ITM329 - xx - yy - zz-zz zzzz

where

xx = PCB version number (derived from TTPCom PCB CAD reference, IT3_02_xx00);

xx = 06 for MP0

yy = hardware configuration;

yy = 01 for standard (TTPCom) module build

yy = 02 for Telular SX6D build

zz-zz zzzz = software version number (derived from TTPCom sw build system);

example N1-10 TD06

For MP0 build, the part numbers will be as follows:

For MP0-standard build

ITM328 - 06 - 01 - zz-zz zzzz

ITM329 - 06 - 01 - zz-zz zzzz

For MP0-Telular build

ITM328 - 06 - 02 - zz-zz zzzz

ITM329 - 06 - 02 - zz-zz zzzz

For MP0-Airo build

ITM328 - 06 - 03 - zz-zz zzzz

ITM329 - 06 - 03 - zz-zz zzzz

sw version numbers will be defined at time of build
