

Tim,

1) and 2) 731 form modified. Please see attached file.

3) Because the Edge power is very low, we only list the GSM data in the test report. Is it accept for you?

4) It's average power.

There is typing errors in page 14. The table is for 1. GPRS 850, 2. GPRS 1900, 3. EGPRS 850, and 4. EGPRS 1900. Attached please find the modified report for this project.

5) The "connect" in manual page 1 is just a USB connector for power adaptor and data cable, not for an antenna. Please refer to attached photos.

6) Mr. Dikin Yang or Robert Chang from our SAR team will contact with you directly to discuss the problems this the SAR report.

Thank you for your favorable consideration upon this project!

Elisa
