

## 4-2. Using DB Scan

Specific features

DB of all MP3 files on the player are created. You can not use the navigation using ID Tag information in case DB file (iRivNavi.iDB) is deleted or damaged accidentally. This can also be used to re-create the DB file on the PC if it is damaged or deleted accidentally.

### DB Scan

#### 2 Updating DB File

- 1 Connect the player to the PC. (Refer to "Connecting to the PC", page 30)

- 2 Open Windows Explorer and select the player drive.

- 3 Right click on the player. Then select "DB File update" to activate DB File update.

- 4 Click "OK" after updating is completed.

※ In case ID Tag information is not in the MP3 file, NO DB displays. In case file or folder name is over 52 characters, Failure displays.

- 5 After disconnecting the player from the host PC, you can use the Navigation function to search for songs using ID3 Tag information. (Refer to "Safely Removing the player from the PC", page 35.)

## 4-2. Using DB Scan

Specific features

You can add the information of the newly saved MP3 file to the DB.

### DB Scan

#### 3 Adding DB

- 1 Connect the player to the PC. (Refer to "Connecting to the PC", page 30)

- 2 Open Windows Explorer and select the player drive.

- 3 Right click on the player after select MP3 files. Then select "Add Music(s) to DB" to add MP3 files to the DB.

- 4 Click "OK" after updating is completed.

ID3 Tag information of the selected files are added to DB. In case DB file is not, new DB file (iRivNavi.iDB) is created.

- 5 After disconnecting the player from the host PC, you can search the added music by using ID3 Tag. (Refer to "Safely Removing the player from the PC", page 35.)

## 4-3. Playback Mode

Specific features

You can set Repeat, Shuffle or Intro playback by choosing these selections under Mode while playing music or motion picture.

### Setting the Playback Mode

- 2 Press the ▲▼ button to play the previous or next playlist at the selected playback mode.

#### 1 Repeat : operate on the basis of playlist

- 1 Play a single playlist repeatedly.
- A Play all playlist in the player repeatedly.

#### 2 Shuffle : operate on the basis of playlist

- SFLI Randomly play all playlists on the player and stop.

#### 3 Intro : Only supports to music file

INTRO

Play only 10 seconds of each playlist in sequential order. It is useful for searching and playing the favorite music among many music files.

## 4-3. Playback Mode

Specific features

### Setting the Playback Mode

#### 4 A-B Repeat

Play a selected interval repeatedly during play.

- 1 Press A button while playing to select the beginning (A) point.

- 2 Press A button again to select the end (B) point. The interval (A to B) will be repeated.

- 3 Press the A button to cancel the interval repeat.

### How to use WINAMP PLAYLIST

#### 1 Making a Playlist

1 Make a PLAYLIST (\*.M3U) using WINAMP.

Winamp execution picture ▶

Launch WINAMP and add songs to make a list.  
Click "LIST OPTS" located on the right bottom and click "SAVE LIST"

1 Name the file name (ex: iriver.m3u) and click "SAVE" to save the list.

3 Save to the player with the \*.M3U and the files added to the playlist.  
The player can also play the playlists created on the PC.  
Refer to "Using playlist" for details.

- You can configure your own settings.
- Function Control is subject to change with different firmware versions.
