

December 20, 2002

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Application Examiner:

Limited Modular approval for the device is being requested.

The device does not meet two out of the eight requirements outlined in FCC Public Notice DA 00-1407 Released: June 26, 2000. The reason for the request is that, although it has its own RF shielding, the MINI PCI card depends on the Laptop host to provide additional shielding to be in compliance.

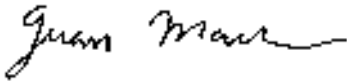

The MINI PCI card will be sold to the Dell computer only for use in their model PP05L laptop. It will not be sold to the general public.

- 1) The modular transmitter must have its own RF shielding.
The EUT contains its own RF shielding, but was tested inside an enclosure to be in compliance. Limited modular approval is requested for this requirement.
- 2) The modular transmitter must have buffered modulation/data inputs.
EUT has buffered data inputs to insure compliance with Part 15 requirements under conditions of excessive data rates or over-modulation. Please refer to the schematics.
- 3) The modular transmitter must have its own power supply regulation.
The EUT has its own power supply regulation to insure compliance with Part 15 requirements regardless of the quality or level of external DC supplying the module from the host unit.
- 4) The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204(c).
The product will be installed inside of the Dell Laptop. The antenna is located inside of the Laptop and so meets the requirements of 15.203 and 15.204(c).

- 5) The modular transmitter must be tested in a stand-alone configuration.
The EUT was tested inside an enclosure to be in compliance. Limited modular approval is requested for this requirement.
- 6) The modular transmitter must be labeled with its own FCC ID number, and, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.
The laptop containing the module will be labeled with the FCC ID of the module.
- 7) The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.
The operating limitations are fully understood by their Broadcom.
- 8) The modular transmitter must comply with any applicable RF exposure requirements.
Please refer to SAR report. The User manual for the product containing this module will reference this requirement.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Juan Martinez
Senior EMC Engineer
