Hi Helen,

Here are the replies to your questions on the above referenced application.

Question #1: The DFS test report section 6.3 indicates "The highest power level within these bands is 25.9 dBm EIRP in the 5250-5350 MHz band ...". But based on previous filings under this FCC ID, the highest power level in the 5250-5350 MHz band is 26.4 dBm EIRP, not 25.9 dBm, please explain where the value comes from.

<CCS Answer:> Revised test report is attached.

Question #2: The DFS test report section 6.3 indicates "(for 40 MHz BANDWIDTH TESTS)The Master Device is a Broadcom Access Point, FCC ID: QDS-BRCM0125." But this FCC ID does not exist. Please verify.

<CCS Answer:> Revised test report is attached.

Thank you for your help.

Best regards,  
September

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
