

December 2, 2010

Elliott TCB
684 W. Maude Ave
Sunnyvale, CA, 94085

To whom it may concern:

The enclosed documents constitute a formal submittal and application for a Class II Permissive change / Reassessment for an 802.11abgn module pursuant to the following rules:

Subpart E of Part 15 of FCC Rules (CFR 47) , UNII Devices
RSS-Gen Issue 2, June 2007, "General Requirements and Information for the
Certification of Radiocommunication Equipment"
RSS-210, Issue 7, June 2007, "Low-power Licence-exempt Radiocommunication
Devices (All Frequency Bands): Category I Equipment"

The application is for a new antenna of the same type as the original certification. The new antenna has higher gain in the 5470-5725 MHz band only. In all other approved bands, the new antenna as equal to or lesser gain than the original antenna.

An evaluation of the spurious emissions and recalculation of the RF exposure for the 5470-5725 MHz band were performed to show that the device is still within compliance with the above stated requirements.

The applicant has requested both long term and short term confidentiality for elements of the FCC application, as noted in the FCC Confidentiality request letter.

In addition, the applicant is requesting confidentiality of all items for Industry Canada.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Hill
Staff Engineer
