Attn: OET Dept.

Ref: FCC Class II Permissive change for FCC ID: QDS-BRCM1051  
(Original Grant date: 11/10/2009)  
Applicant: Broadcom Corporation

Dear Examiner,

This is to request a Class II permissive change for FCC ID: QDS-BRCM1051. There is no hardware or electrical modification made to the applying modular transmitter itself.

The major changes filed under this application:

Change #1 Establishing Netbook/laptop/Notebook host platform approval per KDB 447498 section 2) a) ii) *"A device may be approved for use in multiple host platforms, each with similar family attributes, for example, PDA, laptop and tablet computers, when each host platform is tested in the most conservative exposure conditions and the 1-g SAR is < 0.8 W/kg for all configurations."*

A representative host is selected for SAR evaluation. The most conservative antenna-to-user distance is 160mm. The highest measured SAR is 0.00661 W/kg.

Installation and operating requirements, including restrictions for the most conservative antenna-to-user separation distance and host platform(s), approved in the equipment authorization are documented in the OEM integrators instruction including the information to the end users on how to comply with RF exposure requirements.

Change #2 Adding a portable platform, tablet PC HSTNN-I82C.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Daniel Lawless", written over a white background.
