Attn: OET Dept.
Ref: FCC Class II Permissive change for FCC ID: QDS-BRCM1063
(Original Grant date: 11/09/2011)
Applicant: Broadcom Corporation

Dear Examiner,

This is to request a Class II permissive change for FCC ID: QDS-BRCM1063. There is no hardware or electrical modification made to the applying modular transmitter itself.

The major changes filed under this application:

Change #1 Establishing approval for use in stand-alone portable exposure conditions per KDB 447498 section 2)

a) i) *"A device may be used in portable exposure conditions with no restrictions on host platforms when either the source-based time-averaged output power is $\leq 60/f(\text{GHz})$ mW or all measured 1-g SAR are < 0.4 W/kg."*

The SAR evaluation is performed at the antenna-to-user distance of 0.7cm. The highest measured SAR is 0.356W/kg.

Installation and operating requirements, including restrictions for the most conservative antenna-to-user separation distance and host platform(s), approved in the equipment authorization are documented in the OEM integrators instruction. This also includes the information to the end users on how to comply with RF exposure requirements.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

Daniel Lawless

Director of Engineering, Systems Operations
