RE: FCC/IC application for Broadcom Corporation, FCC ID: QDS-BRCM1065, IC: 4324A-BRCM1065

To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for a 802.11bgn 1x2 + Bluetooth 4.0 radio module pursuant to the following rules:

Subpart B of Part 15 of FCC Rules (CFR 47)  
Subpart C of Part 15 of FCC Rules (CFR 47), Intentional Radiators  
RSS-Gen Issue 3, December 2010, "General Requirements and Information for the Certification of Radiocommunication Equipment"  
RSS-210, Issue 8, December 2010, "Low-power Licence-exempt Radiocommunication Devices (All Frequency Bands): Category I Equipment"

The application is for a single modular approval.

This application is for a new FCC approval and a re-assessment for IC.

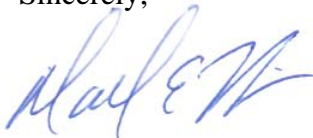

This product was original submitted and granted under the same FCC ID. An error in an output power measurement was discovered, after the fact, which resulted in a higher output power for the 802.11b mode of operation. The original FCC grant has been dismissed, so that the applicant can refile under the same FCC ID.

The only change to the original test data presented is the channel 6 at 2437 MHz 802.11b mode output power. All other measurements remain unchanged from the original submittal.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Hill  
Staff Engineer
