Re: User manual supplement

Dear Mike,

As you know, Pointred has certified a number of different radio products all using the same IF units for cpe and base station (only the frequency range of the outdoor unit is different for each product).

As such, PointRed has standardized the bulk of the user manual with respect to antenna installation and software setup.

They will supply a user manual supply addendum with each product that will be tailored for the specific MPE, antenna type, and power output reporting requirements for the radio.

For the referenced device, a 5.7 GHz addendum has been uploaded to the site.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Pointred Technologies Inc.
