Hi Mike,

This is the reply for Airvast PCI card for TCB filing and please help to issue the grant if there has no other problem, thank you.
For Q1, the user manual has been rewritten and please refer to the attached for the revised user manual.
For Q2, it's revised and please refer to the attached test report for details.
For Q3, please refer to the attached test setup photos for details.

Best Regards,

Lucy

Notice_content

Question #1: The information contains in the user manual is misleading. Based upon the user manual, this device is sold to OEM integrator only and require this device with detachable antenna to maintain at least 20 cm separation distance. This device when use with Laptop computer, end user will not be able to maintain at least 20 cm separation distance. Please re-write the information contain in the user manual. Please provide clear

3/12/2004

instruction to the OEM and to the end user in case of portable configuration and mobile configuration.

Question #2; Output power in mW listed in the section 7.2 of test report is wrong. Please make necessary correction.

Question #3: Please provide test setup photo for portable configuration during radiated spurious emission tests.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
