RE: Leapfrog

FCC ID: QDX2025001

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The C31 proposed in the letter and schematics does not appear to be seen in the photographs provided. Please explain.
- 2) The additional proposed changes appear on a separate antenna board. Please provide top/bottom photographs of this board as necessary to show any changes.
- 3) The confidentiality letter lists schematics, operational description, and block diagram. Only schematics were provided with this application. Please provide a corrected confidentiality letter.
- 4) Most of the antennas listed in the test report appear to be on a one year calibration cycle, however the Biconical antenna appears to be on a 2 year. Please comment.
- 5) The calculated extrapolation factor for correcting from 10 meter to 30 meter as given near the bottom of page 5 of 6 does not match those given above. Note that the calculations appear correct. Please correct the description above the bottom table.
- 6) The harmonic corrected level in the table appears that it should have been $16.2 + 20 \log (10/30) = 6.7$ dBuV/m according to the information provided. Please comment.
- 7) Please comment on the test distance used for measurements above 30 MHz.

Timothy R. Johnson
Examining Engineer
