# Your PCS Vision Camera

**Welcome – you've made the right choice**

Sprint built the largest all-digital, all-PCS nationwide network from the ground up, reaching more than 230 million people. We built our network to give you what we believe you really want from a wireless phone: clear sound, private conversations and innovative products.

Your PCS Vision Camera allows you to take VGA-quality digital pictures and send them to your friends and family – wherever and whenever you want. This well-designed camera is easy-to-use and attaches to Samsung N400 and Samsung A500 phones.

When your camera is connected to a phone, you can upload and share pictures instantly via email with the PCS PictureShare service . The PCS PictureShare service is also available through the Web on a personal computer for picture enhancement and advanced management features.

Since you're probably eager to begin using the camera, we encourage you to flip to Section One – Getting Started With Your PCS Vision Camera. This section provides basic phone information and lets you know how to contact Sprint should you have any questions.

Thank you for choosing Sprint and enjoy your new camera.

# Getting to Know Your PCS Vision Camera

## In This Section

▶ **Features of Your PCS Vision Camera**

▶ **Cleaning the Lens and Viewfinder**

▶ **Using the Battery**

▶ **Camera Precautions**

▶ **Troubleshooting**

▶ **Getting Help**

This section walks you through the basic information and features of your PCS Vision Camera. Once you have completed this section, you're ready to explore the advanced features of your new camera and PCS PictureShare service.

## Features of Your PCS Vision Camera

Congratulations on the purchase of your PCS Vision Camera. This camera is lightweight, easy-to-use, reliable and offers many significant features:

► The PCS Vision Camera provides quality pictures by simply pressing a button (page xx).

► Review, delete and upload pictures from your phone (page xx).

► The PCS PictureShare WAP service on your phone lets you share and comment on pictures via email (page xx).

► You can access the PCS PictureShare Web service from a personal computer for picture enhancement and management features (page xx).

## Cleaning the Lens and Viewfinder

To clean your lens or viewfinder:

1. Blow gently on the lens or viewfinder to remove dust and dirt.

2. Wipe the lens or viewfinder gently with a soft, lint-free cloth or an untreated lens-cleaning tissue. Do not use cleaning solutions unless they are designed specifically for camera lenses.

**Note:** Do not wipe your camera lens or viewfinder with a chemically-treated eyeglass lens tissue.

## Using the Battery

### Installing the Battery

To insert a battery into the camera:

1. Open the connector cover.

2. Remove the connector.

3. Slide open the battery cover (refer to the figure).

4. Insert the battery.

**WARNING:** UPLOAD YOUR PICTURES BEFORE YOU REPLACE THE BATTERY. OTHERWISE, YOU WILL LOSE THE PICTURES.

### Battery Precautions

Follow these precautions when installing a battery:

► Use only the size and type specified.

► Be sure to follow the correct polarity. A reversed battery may cause damage to the camera.

► If you will not use the camera for a long period of time, save all the pictures and remove the battery to prevent damage or injury from battery leakage.

**WARNING:** UPLOAD ALL PICTURES BEFORE THE BATTERY IS EMPTY.

## Camera Precautions

Be sure to observe the following precautions when using your camera:

► Do not open the case of the camera for any reason. Always leave service to authorized repair facilities.

► Keep the camera away from water and other liquids. Do not use the camera when it is raining or snowing. Your camera can be damaged by water or any other liquids.

► If foreign matter or water gets into your camera, turn the power off immediately and contact your local authorized repair facilities or service.

► The image data stored in the camera's memory can be deleted by physical damage or malfunction of your camera. Be sure to keep backup copies of your images by transferring them to a personal computer.

► Under a circumstance of electrostatic discharge, the camera might malfunction. You may need to reset the camera.

► Do not take a picture while walking or operating a vehicle.

► High temperatures can damage your camera. Try not to leave your camera in a sealed vehicle or in direct sunlight.

► Do not place the camera in unstable locations where the camera may fall and be damaged.

► Pressing or touching the Status LCD Display or lens can damage your camera.

► When the camera is on, removing the battery may delete saved images.

► Try to remove the battery when the camera is not in use for long periods of time.

► Only a 3V Lithium Battery (CR123A) can be use.

► Dispose of the battery in a manner that complies with applicable laws.

## Troubleshooting

**Symptom**: Camera won't turn on

**Possible Causes**: 1) Battery was not installed correctly; 2) Battery is dead or weak

**Possible solutions**: 1) Install battery correctly; 2) Replace battery

**Symptom**: Poor quality pictures

**Possible Causes**: 1) Poor lighting; 2) The user moved his or her hands while taking a picture; 3) The lens is dirty or smeared

**Possible Solutions**: 1) Take picture in better lighting; 2) Hold camera steady when taking a picture; 3) Clean the lens with a soft cloth

**Symptom**: Daylight picture is too dark

**Possible Cause**: The subject is in front of bright light

**Possible Solution**: Change the subject's position

**Symptom**: Can't take a picture

**Possible Causes**: 1) Memory is full; 2) Power is off; 3) Battery is dead or weak

**Possible Solutions**: 1) Connect to the PCS phone and transfer pictures; 2) Turn power on; 3) Replace battery

**Symptom**: Picture processed is not stored in the memory

**Possible Cause**: Poor light

**Possible Solution**: Take picture again in batter lighting

**Symptom**: Part of the picture is missing

**Possible Cause**: Something was blocking the lens

**Possible Solution**: Keep hand, fingers, etc. away from the lens

**Symptom**: Can't transfer image to phone

**Possible Causes**: 1) Power is off; 2) The PCS phone is not in the correct mode

**Possible Solutions**: 1) Turn power on; 2) Make sure the PCS phone is in the right mode to transfer image.

## Getting Help
