Re: Barring of emergency codes (911)

The basestation conform to GSM04.08 v8.0.0. The allowing or barring of emergency calls is controlled in the EC bit of RACH_CONTROL_PARAMETERS Information Element (see 4.08, section 10.5.2.29). This bit is managed by the operator of the mobile network to which this basestation is connected. Emergency calls cannot be barred by the basestation if EC is set to zero.

Yours Sincerely

A handwritten signature in black ink, appearing to read 'Nick Johnson', written in a cursive style.
