FCC

**Evaluation of ip.access NBT144G nanoBST
FCC id: QGGKU02ZZT**

I have evaluated the submission and find it compliant.

During the evaluation the following clarifications were made :

1: Label

Two labels were presented but only one shown on the placement drawing.
The client has clarified that one label is attached as shown, the other is attached to the corresponding position on the opposite face of the equipment.

2: Model number

Reference is made to the product as the NBT144G and the 140.
The client has clarified that both identities are used, NBT144G is the model number, 140 is the model identification.

Yours sincerely

Bill Wilson
