<b>Equipment Class</b>	DXT – Part 15 Low Power Transceiver, Rx Verified
<b>Rule Part</b>	15C (15.231)

**Overview**

This application is for a wireless occupancy sensor, which is designed to control turning lights on or off depending on building room occupancy. The device transmits at 315 MHz under 15.231, using fixed power with a single whip antenna. The device is categorically excluded from RF exposure evaluation.

Confidentiality requested for allowed files. Request is properly addressed and referenced.

No short term confidentiality requested.

**Recommendation**

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
