

Justification of the modifications of the FCC ID: QHKRXU500

The RXU500 Reader and antenna system is meant to be integrated in several RFID stations offer a wide range of products suiting all possible verticals markets.

In order to address the retail market, a specific compact and highly directive antenna was designed and needed to be added onto the QHKRXU500 existing set of antennas which did not fulfill all the product conditions.

Therefore a Class II change adding this new antenna is requested.
