RF Exposure Information

The requirement for a determination of compliance and the preparation of an Environmental Assessment regarding human exposure to levels of radiofrequency radiation is regulated in 47 CFR §1.1307 b). Such a study is necessary only for facilities, operations and transmitters that fall into the categories listed in table 1 of §1.1307 or those specified in paragraph b) (2) of the same section.

The manikin does not fall into any of the categories listed in table 1.

Neither is it a licensed transmitter or an unlicensed transmitter authorized under §§15.253, 15.255, 15.257, part 15 subpart D or subpart E as described in §1.1307 b) (2).

The regulation related to Wireless Medical Telemetry Service (WMTS) and Medical Implant Communications Service (MICS) has no relevant for this product.

The manikin will therefore not fall into any of the categories mentioned in §1.1307 b) (2).

Consequently the manikin is categorically excluded from making a determination of compliance with the exposure limits in §1.1310 or §2.1093 and preparing eventually an Environmental Assessment.

Sincerely,

Terje Bondhus
Regulatory Affairs Specialist
