Attention: Mike Kuo

Confidentiality Request per 0.459 of FCC Rule
Application for an 802.15.4 Zigbee Radio Module
Applicant: Invensys Controls

FCC ID: QI2-EMS2400

To whom it may concern,

Request is hereby submitted, on behalf of my client Invensys Controls to withhold from public review certain portions of the application for equipment certification for the referenced FCC identifier. In particular, the following sections of the application and report are requested to be kept confidential:

Schematics
Block Diagram
Operational Description
OEM Module Installation manual

Rationale for request for confidentiality:

Invensys has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the confidential portions of this application to competitors would give them competitive advantage in developing similar products. The OEM installation instructions contain block diagram and pin designation information that would normally be eligible for withholding from public view if submitted as part of block diagram, schematic, or operational description.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Invensys Controls
