## Request for Class II Permissive Change

### FCC ID: QIPEHS6-A

Please be notified that we, the undersigned, Gemalto M2M GmbH declare that the reasons for this Class II permissive change are as below:

The final design EHS6-A (HW version: B2.1) product was a revision from last builds of EHS6-A (HW version: B2).

They take use of the same PCB layer-up and 2D dimension, and there are only a few schematic, PCB layout and matching parts assembly BOM changes. The schematics of RF part as well as the major logic unit were kept unchanged.

The noticeable minor change from EHS6-A (HW version: B2) to EHS6-A (HW version: B2.1) is the "changing NOR memory to NAND memory".

Axel Heike  
Certification Manager

Lars Wehmeier  
Head of System Test
