### Request for Class II Permissive Change

FCC ID:QIPELS61-AUS

Grant date: 06/23/2016

To: Federal Communication Commission

Please be notified that we, the undersigned, Gemalto M2M GmbH declare that the reasons for this Class II permissive change are as below:

The GWM400 is a compact UMTS/LTE modern base on ELS61-AUS module. The main function of GWM400, like data transferring, is using ELS61-AUS. Besides this module, GWM400 also add some other circuits, such as: DC/DC converter, auto power on circuit, signal level shifter and connectors. All these circuits and ELS61-AUS module are mounted in one PCB, and covered by a plastic housing.

Thank you.

Sincerely yours,

Axel Heike / Manager Approval
