Ref: C2PC request for FCC ID: QIPMV31-W

Dear Madam or Sir,

We, the undersigned, would like to request a C2PC for our module with FCC ID: QIPMV31- W.

Previous certification was carried with a MPE document based on the antenna gain used during the testing. However, with the aim to offer more flexibility to our customers, we would like to request a C2PC for this product in order to include in the certification the maximum antenna gain (dBi) that can be used in any end product while still meeting the limits. A new MPE calculations document will be provided accordingly.

We remain at your disposal in case further clarifications were needed.

Best regards
THALES DIS AIS Deutschland GmbH
