Your letter of  
Our reference  
Date 20 December 2012

**Subject: Class II Permissive Change for QIPXS8**

To Whom It May Concern:

The CDMA module is currently approved for CDMA BC0 (824,7 MHz to 848,31MHz).

The duplexer will be replaced by a pin-compatible duplexer together with an appropriate alignment on the antenna side of the duplexer that allows an expanded CDMA frequency range from 817,9 MHz to 823,1 MHz.

The layout and all active components will not be changed

This change is in accordance with the FCC (Inquiry 378942) and to Sprint Nexel's Waiver of section 90.209 that permits the Operation of Broadband CDMA Technology in the 817-824 MHz Band.

Sincerely,

**Thorsten Liebig**
