Re: Request for Audit Sample & Grant Dismissal (FCC ID: QIQ-H200W-ICT-V01)

Dear Mr. Abbondante,

Your request for an audit sample with FCC ID **QIQ-H200W-ICT-V01** was received, however we regret that no sample of a device bearing this ID can be provided.

The device did not pass our final design validation criteria, and hence never went to market under this FCC ID. We are presently in the process of making changes to the device, and still intend to market it, however this will be under a different FCC ID grant (we will re-test and re-certify).

In summary:

- No devices bearing this FCC ID (QIQ-H200W-ICT-V01) were ever sold in the US or in any other country.
- Any prototype testing samples bearing this ID have been quarantined or destroyed, and will never be marketed or distributed in the US or anywhere else in the World.
- Should an updated model go to market in the future it will be under a different FCC ID (the device will be re-tested and re-certified).

If you could please notify the FCC and arrange to have the FCC ID in question, **QIQ-H200W-ICT-V01**, dismissed/cancelled, it would be much appreciated. If you have any questions or requests, please reach me via any of the channels below:

Regards,

Mike Pearson, MR, QA & RA
