RE: Change to identification of presently authorized equipment (New FCC ID: QIQ-H200W-ICT-V02)

Dear Sir/Madam:

This is a request for a change in identification of presently authorized equipment. The details of the original grant are as follows:

Original FCC ID: QIQ-H200W-ICT-V01
Date of Original Grant: 02/17/2013

Requested New ID: QIQ-H200W-ICT-V02

It must be noted that no devices were released to market with the authorized ID under the original grant. Prior to going to market, it was decided that a small hardware change was necessary. Specifically, a power-amplifier was added to mitigate some performance issues identified in the original unit.

As a result, all tests from the previous grant application are obsolete. All the tests have been repeated following the changes. These new test-reports, along with updated schematics and block-diagrams have been supplied with the application for the new ID.

Sincerely,

Mike Pearson
MR, QA & RA
