Explanation

The Access Router are the next-generation routing and gateway devices, which provide the routing ,switching,wireless,voice,and security functions.The AR Series Products are usually located between an enterprise network and a public network,functioning as the only ingress and egress for data transmitted between the two networks.

AR160 Series have differences products, Some products shares the same schematic diagram and the same PCB board, They are packed into different types by hardware BOM (Bill of Material) list or software.

AR169-P-M9 belongs to AR160 Series, So AR-1OSPBT-DSCH_VB.pdf and ar16xa_am3.pdf are the common schematic diagrams for some types of products which contain AR169-P-M9.In product R & D period, It usually distinguishes these different type by hardware BOM (Bill of Material) list.

AR169-P-M9 have 1VDSL WAN,1GE WAN,4GE LAN(POE+) , 4 USB ,Multimedia Card including Bluetooth antenna, HDMI, VGA, RS485/232, headset, and microphone interfaces,without LTE, Zigbee and Wi-Fi module.

Signature:

A handwritten signature in black ink that reads "Zhang Xinghai". The signature is written in a cursive, flowing style.

Zhang, Xinghai

EMC Laboratory Manager
