

Appendix A. Photographs of the Test Set-Up

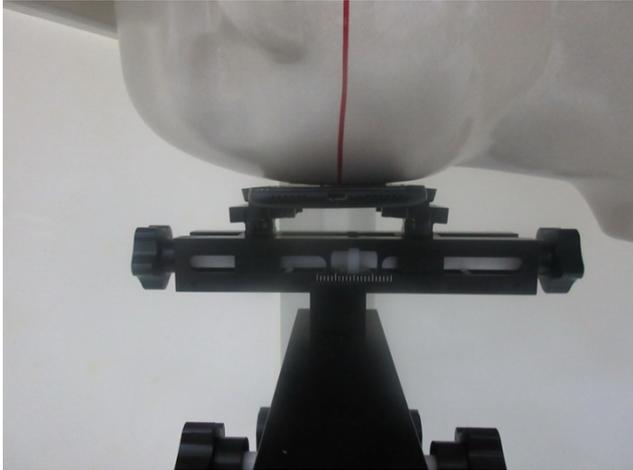

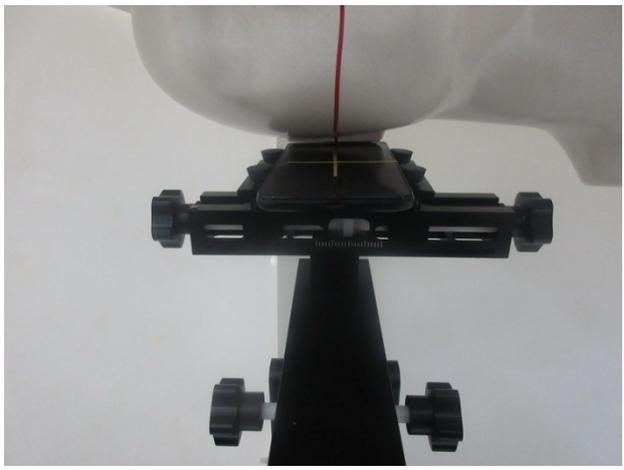

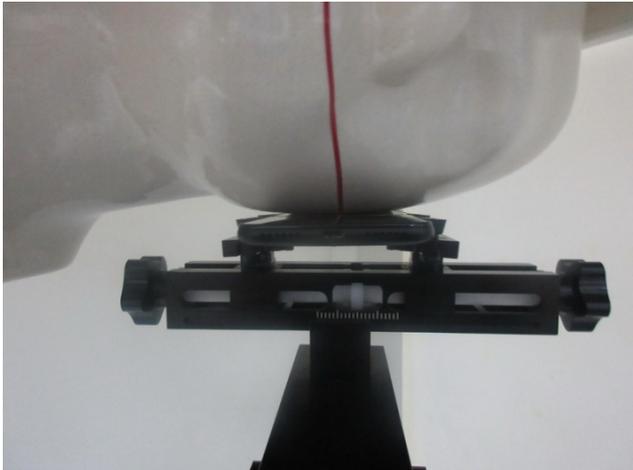

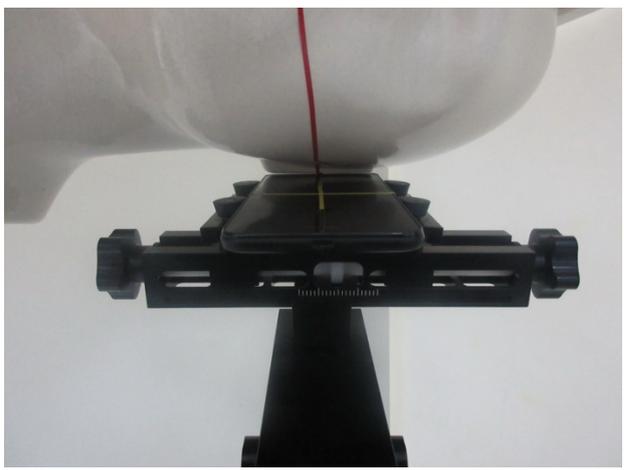

<p>Photo 1: Right Cheek</p>	<p>Photo 2: Right Tilted</p>
 A photograph showing a white anatomical model of a human head and neck. A red vertical line is drawn on the right cheek. A black mechanical device is mounted on the chin, with a yellow horizontal line indicating a specific measurement or alignment.	 A photograph of the same setup as Photo 1, but the head model is tilted to the right. The red line and yellow line are still visible, showing their orientation relative to the tilted head.
<p>Photo 3: Left Cheek</p>	<p>Photo 4: Left Tilted</p>
 A photograph showing the white anatomical model from the left side. A red vertical line is drawn on the left cheek. The black mechanical device is mounted on the chin, with a yellow horizontal line.	 A photograph of the same setup as Photo 3, but the head model is tilted to the left. The red line and yellow line are visible, showing their orientation relative to the tilted head.
<p>Photo 5: Front Face_15mm</p>	<p>Photo 6: Rear Face_15mm</p>
 A photograph taken from a front-facing perspective, 15mm away from the device. The white anatomical model is visible at the top, and the black mechanical device is in the foreground.	 A photograph taken from a rear-facing perspective, 15mm away from the device. The white anatomical model is visible at the top, and the black mechanical device is in the foreground.

Photo 7: Front Face_10mm

Photo 8: Rear Face_10mm

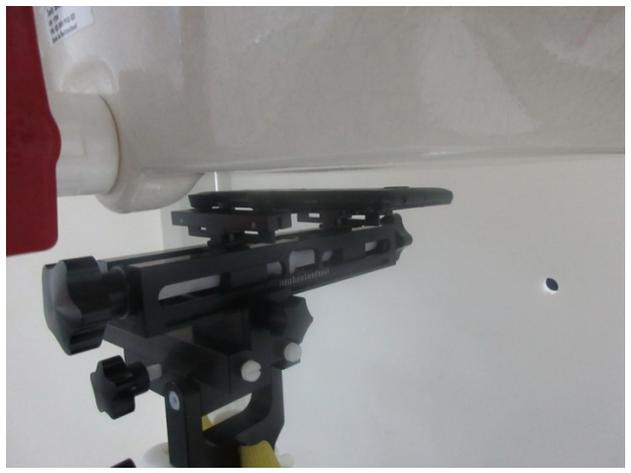

Photo 9: Left Side_10mm

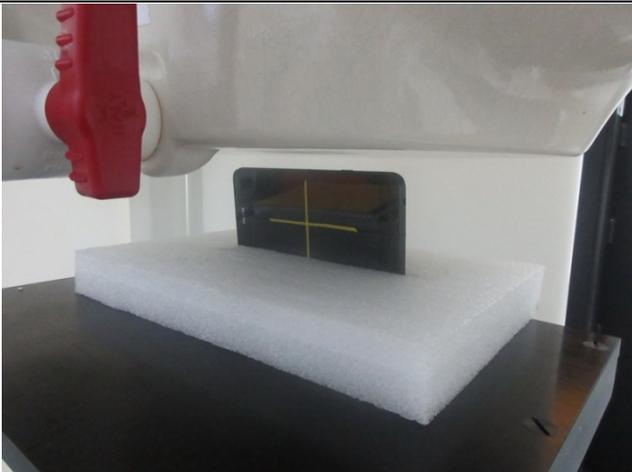

Photo 10: Right Side_10mm

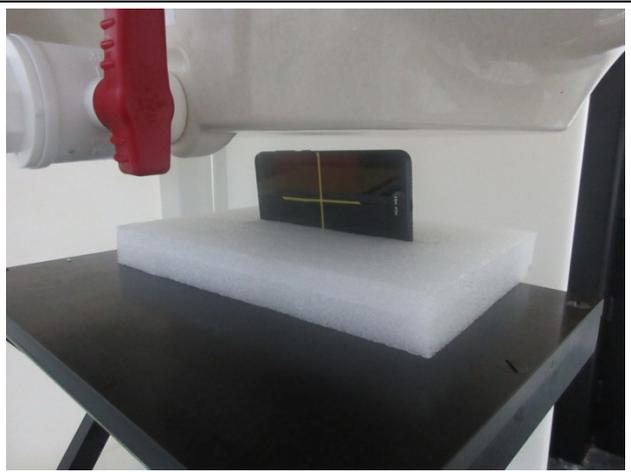

Photo 11: Top Side_10mm

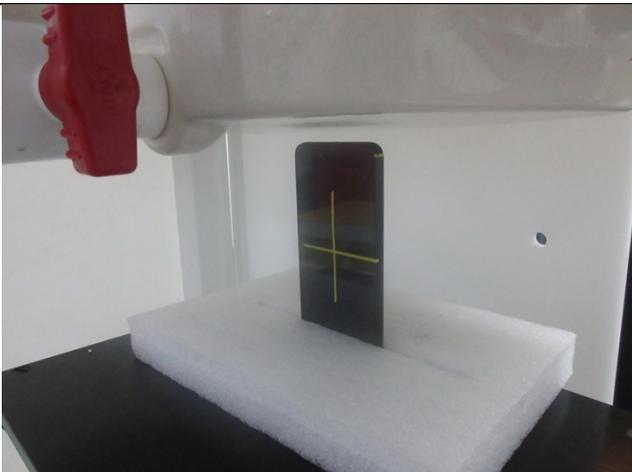

Photo 12: Bottom Side_10mm
