Walton-on-Thames,
Surrey,
KT12 2TD

Dear Sir or Madam,

We,

Huawei Technologies Co., Ltd.
Bantian, Longgang District, Shenzhen, 518129, China

Hereby to do the Justification on FCC C2PC application: LTE DAU, Model no.:eA680-950,
FCC ID: QISEA680-950, Grant date:08/08/2017

Description of the change as following:

- (1) Add uplink intra-band contiguous 2CA for 5725-5850MHz by software.
- (2) Change hardware version from CL1EA950R VER.E to CL2EA950R VER.A because 1151 chip is upgraded from V100 to V210 and partially matched resistor and capacitor are changed. This chip is not a chip in RF modular, so no any RF parameters were changed, it only support slave DFS function in band 5725-5850 MHz after the upgraded, other functions are same as original application. The upgraded slave DFS function in band 5725-5850 MHz will be closed in USA market, it will only open in EU market.

More detailed information please refer to below document

- Part list
- Schematic
- Operating description
- Internal photos

So in this FCC C2PC application new RF test report R1903H0045-R1 was submitted, new test data for UP 2CA was added based on original application test report RHA1704-0043RF02R5, and the original test data are still effective, they are representative of the compliance of this change of the product.

Sincerely,

Zhangxinghai
EMC Laboratory Manager

For and Behalf of:
Huawei Technologies Co., Ltd.
