

LYA-LX9 CA CHANGE ASSESSMENT

LYA-LX9 project will add downlink carrier aggregation CA_4A-28A, CA_4A-5A, CA_2A-28A, CA_2A-5A and CA_4A-7A by software. For CA_4A-28A, CA_4A-5A, CA_2A-28A and CA_2A-5A, no matter which band is PCC the UE TX target power is the same as single band. For CA_4A-7A, no matter which band is PCC the UE TX target power is lower than single band. So these new CA DL configurations will not result in a new worst case configuration in uplink if the single bands performance is OK.
