RE: HotZone Duo FCCID: QJE-HZD-4300 - FCC 15.407(c)

To Whom It May Concern:

The Motorola HotZone Duo device complies with the FCC 15.407(c) requirement, which reads:

(c) The device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. These provisions are not intended to preclude the transmission of control or signaling information or the use of repetitive codes used by certain digital technologies to complete frame or burst intervals. Applicants shall include in their application for equipment authorization a description of how this requirement is met.

In the Motorola HotZone Duo all radio transmissions are controlled by embedded software. These transmissions will be discontinued upon failure or if there is no information to transmit.

A handwritten signature in blue ink, reading "Robert Greenway".
