Hi, Chris.

Here is revised user manul.

In the file of Block diagram, there is a plot for the pulse train description, please use it as the tech description. BTW, the client has the urgent need for this project.

Regards,

Wei
908-533-4029 for this week.

Wei, thank you for forwarding the e-mail to me. I already had all those files from your upload to CCS. I still do not have the Operational Description. Please provide this Operational Description (technical Description) exhibit. Hopefully this will answer the questions I have.

Best regards,

Chris Harvey

HI, Chris.

This is the email I sent to Lucy. The plot in the report is to show the pulse width only. It was taken from a continous transmitting testing sample (programmed for testing only). The puse train spc. was described in the operational description whcih should provide the enough info.

Please let me know if this is ok. The applicant like to get this approval soon.

Regards,

Wei

Note: forwarded message attached.
