

RF EXPOSURE

The RMR-C430 radar detector is a dual conversion scanning super-heterodyne receiver. The RMR-C430 detects all radar bands used by law enforcement:

10,475 – to – 10,575 MHz,
24,050 – to – 24,250 MHz,
and 33,400 – to – 36,000 MHz.

The RMR-C430 is designed exclusively for automotive use and is powered by the 12-Volt electrical system in a car or truck.
