PASSPORT Features

The PASSPORT introduces the following state-ofthe-art performance and features:

- Long-range K and Ka-band radar performance including instant-on POP mode.
- Exclusive AutoSensitivity intelligently filters out annoying false alarms, plus Highway, Auto, and Auto No X settings.
- Exclusive ExpertMeter tracks and displays up to 4 radar signals simultaneously.
- Exclusive SpecDisplay provides actual numeric frequency for any radar signal and alert bar.
- The PASSPORT now with built in Bluetooth® technology gives you access to ESCORT's award-winning app, ESCORT Live. Features when connected to ESCORT Live:
- Our exclusive real-time ticket protection network, which warns you of upcoming alerts received by other users in the area.
- Our DEFENDER Database, which warns you of verified speed traps, speed cameras. and red light cameras.
- Our most popular GPS-powered features, including speed-limit data for over-speed alerts, live traffic data for your current location, and TrueLockTM to help eliminate false alerts. You can also Mark Locations for future reference.

register your PASSPORT device. Be sure to have your PASSPORT unit nearby, as you will need the serial number located on the bottom of the case.

Before downloading ESCORT Live, you must first

Registration

- 1 Visit www.EscortRadar.com and click Product Registration.
- **2** Click the link for Escort Live Ready devices.
- **3** Follow the onscreen instructions to register vour device.

Be sure to write down the username and password vou create, as you will need this information to access and download ESCORT Live. (You will also receive an e-mail with this information, once you have registered your device.)

- **7** Open the app, walk through the tutorial, and vou're ready to hit the road!

For Bluetooth pairing tips and more information on using ESCORT Live! visit: www.EscortRadar.com

For optimum detection performance, we recommend the following:

 Using the Windshield Mount, mount your PASSPORT level, and high enough on your front windshield to provide a clear view of the road from the front and rear.

· Mount PASSPORT away from windshield wipers, other solid objects, and heavily tinted areas that might obstruct the radar antenna or laser lens.

PASSPORT (by the word ESCORT) and slide the EasyMount Bracket into the slot until it is locked into the position which best fits the angle of your windshield (there are four settings available). For extremely horizontal or extremely sloped windshields, the EasyMount Bracket can be bent.

1 Depress the adjustment button on the top of

To ensure that the suction cups adhere to the windshield firmly, be sure to keep both your windshield and the suction cups clean.

2 To adjust the PASSPORT on your windshield, use the EasyMount adjustment button located on the top of the PASSPORT, and slide PASSPORT forward or backward to obtain a level position.

When installed and adjusted properly, the back top edge of the PASSPORT should rest solidly against your windshield.

User's Tip: You can leave the EasyMount bracket in place on your windshield, and easily remove PASSPORT by pressing the adjustment button and sliding PASSPORT off the mount. Again, be sure to position the bracket where it won't present a hazard in the event of an accident.

Additional mounts are available at EscortRadar.

Controls & Features

Using PASSPORT

- 1 Plug small end of SmartCord into modular iack on PASSPORT and large end of SmartCord into your car's lighter/accessory socket.
- **2** PASSPORT should power on automatically. If not, press the device's power button.
