Hello Dennis,

You sit up late working!

Thank you very much for teaching.

As we corrected the data in the applicable pages <Page4,12,13,14,15,16 and 17> of the testreport and uploaded through ATCB's website, could you check them?

We hope we could clear every matter and get the certificate within today.
Thank you.

Very best regards,

Yukie Koyama

Hi Yukie
While the date of implementation on the changes to CFR 47 is typically60 days
after publishing in Federal REGISTER, please note that the FCC has postponed
this ammdement ot CFR 47 until September 9. This means that the lowering of
the frequencies to 150kHz and the inclusion of CISPR limits as the CFR
limtis
will not take place till at least that time. Until then, the existing
rules
must be followed. This means that if CISPR 22 is used for conducted it
must be
used for radiated as well. Sorry. The good thing is the data is probably
compliant either way, you just have to correct the data.

In FR Doc. 0217264 the Commission is correcting the \$B!) (JATES: Effective August
9, 2002 of the Commission \$B!) (J rules to reflect the correct DATES: Effective
September 9, 2002"

Thanks
Dennis
