

Correspondence Summary Questions and Answers

March 21, 2003

SUBJECT: GLOBAL LINK CORPORATION LIMITED - FCC ID: QL2M2X

TCB Q-1: The device has a connector for recharging Nickel Metal Hydride batteries using an AC/DC power adapter. Can the transmitter be operated while charging the batteries? If so, please provide conducted spurious emissions test data per part 15.207.

Applicant A-1: The manufacturer has confirmed that the device will not transmit while the battery charger is recharging the batteries.
