COVER LETTER

**Re: Malå GeoScience AB, application for Ground Penetrating
Radar FCC ID: QLA80MHzHDR**

Dear Sirs,

While reviewing this application you may find that the external photos shown in the test report is different from the external photos presented separately.

The reason for this change was a late marketing decision in which we decided to change the top lid from black/blue rotational molded polyethylene plastics to white/grey vacuum molded ABS plastic. Both these material are electrically neutral and no changes have been made to internal designs such as shields, electronics, cabling etc.

Best regards

Bernth Johansson
Head R&D
Malå GeoScience
