USB KVMP Switch (GCS1712/GCS1714)

1. Welcome

Congratulations on your new IOGEAR purchase!

IOGEAR's USB RF Wireless Optical Mini Mouse is an excellent tool for mobile professionals. RF- or 'radio frequency'- is a power-efficient wireless technology that allows you the freedom of a wireless mouse. The small and portable design saves precious space in your mobile work area, and it is one less tangled wire in your laptop carrying case. The ergonomically contoured design and optical sensor offer comfortable use on most surfaces, without the need for a mouse pad.

This mouse features 800 dpi resolution, meaning it offers twice the accuracy of typical mouse movement, which is ideal for graphic designing or any other type of computing where precision matters. This unit is USB ready, Plug-n-Play and hot pluggable.

For added convenience, the RF Mini Mouse also features a power On/Off switch to avoid battery drainage during travel, and a USB charger cable for convenient charging through the USB port on laptops. This mouse is the ultimate tool for the road warrior of today.

10. USB Connector
11. Connect Button

2. Features

- 800 dpi resolution offers twice the accuracy of typical mouse movement
- Operates on most surfaces without the need for a mouse pad
- Works up to 4 feet from your computer and can easily be positioned wherever it is most comfortable
- Plug-n-Play and Hot Pluggable
- Light and very portable, great for mobile professionals
- Saves precious space in your mobile work area
- Power On/Off switch conserves electricity for maximum battery life
- Comes with a USB charger to allow you to charge batteries through the laptop
- Ergonomically contoured design for comfortable use
- 3 Year Limited Warranty

3. Requirements

- Windows98, 98SE, 2000, ME, XP
- Mac OS X or later
(For Mac 9.x or earlier, functions only as a one button mouse)
- Available USB port

6. Installation Instruction

BATTERY INSTALLATION

1. Pull the battery cover release toward the direction as indicated in the drawing
2. Insert the batteries (included in the package) into the battery compartment
3. Put the cover back on.
4. Make sure the power On/Off switch is at ON position. We do recommend that you charge the batteries for 10 hours before using the mouse.
5. To charge the batteries, just plug the USB charger cable into the USB port on your computer, and the mouse, and leave it on for a few hours.

WINDOWS

1. Turn on your computer, and let it boot all the way into the operating system
2. Insert the USB receiver into one of the USB port on your computer. You will see a dialog box, indicating that the computer has detected a new USB device. For Windows 98/98SE, a dialog box will come up to prompt you to insert the 98/98SE CD into the CD ROM in order to obtain the USB driver. For the computers where the USB ports are placed in an inaccessible area, you will need to plug the USB extension cable (included in the package) into the USB port on the computer, then plug the receiver into the USB extension cable
3. After a few seconds, the light in your mouse will begin to flicker. This is normal, and should last until the mouse and the receiver are connected.
4. Press the connect button on the mouse, then press the connect button on the receiver. Press firmly for 2-3 seconds.
5. After you release the connect button, the mouse is ready for use.

MAC

This mouse is Plug-n-Play for Macs. Just plug the receiver in the USB port, then press the connect button on both the mouse and the receiver. You will be able to use the mouse immediately after that.

9. Radio & TV Interference Statement

WARNING!!! This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. This equipment has been tested and found to comply within the limits for a class B device, pursuant to Subpart J of Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be required to correct the interference. There is no guarantee that radio frequency interference will not be created in particular locations.

LOGEAR® is not responsible for any radio or television interference caused by unauthorized modification of your mechanism or cables.

Please avoid using this mouse on glass, mirror and metal surfaces.

Please do not place any other RF unit close to the mouse and its receiver to avoid interference.

When travelling, please turn the power On/Off switch to the OFF position in order to save battery life. You do not need to turn the power off if the mouse is sitting still, the power consumption will be lowered automatically after you stop using the mouse for a while.

When the mouse movements turn sluggish, it may be the time for you to recharge the batteries. Just plug the USB charger cable into the USB port on your computer, and the mouse, and leave it on for a few hours. You don't need to turn off the power, and you can use the mouse when it is charging the batteries. A completely depleted battery requires 10 hours to charge.

10. Limited Warranty

IN NO EVENT SHALL THE DIRECT VENDOR'S LIABILITY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THE PRODUCT, DISK OR ITS DOCUMENTATION EXCEED THE PRICE PAID FOR THE PRODUCT.

The direct vendor makes no warranty or representation, expressed, implied, or statutory with respect to the contents or use of this documentation, and especially disclaims its quality, performance, merchantability, or fitness for any particular purpose.

The direct vendor also reserves the right to, but not limited to, revise or update the device or documentation without obligation to notify any individual or entity of such revisions, or updates. For further inquires please contact your direct vendor.

Function	Specification

Frequency Band	27.015 MHz	
Interface	USB	
Number of IDs	2048	
Operating Range	4 ft. (1.2m)	
Power	Amps	< 20mA
	Voltage	2.4 V
Resolution	800 dpi	

FCC Compliance and Advisory Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

The equipment has been certified to comply with the limits for a Class B computing device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by switching the equipment off and on. The user can try to correct the interference by the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
